Never before in history has the pace of change been as rapid as it is today. Time is evolving, technology is advancing, and the market is transforming at an unprecedented speed. In the world of transport, most electric vehicles hitting the market are designed with business needs in mind. However, the arrival of the Mahindra ZEO marks a game-changing moment. This vehicle isn't just built to propel your business forward—it's set to revolutionize it entirely, or as we like to say, "electrify" it. To truly electrify a business, you need the perfect blend of power, torque, pickup, range, payload, safety, and comfort—everything the Mahindra ZEO delivers.

What's even more remarkable is that the Mahindra ZEO benefits not just businesses but also the environment. Its name, Mahindra ZEO, stands for "zero emission option," reflecting its eco-friendly nature. With every drive, you're not just electrifying your business—you're helping purify the planet and contributing to a better world.

Now, let's take a closer look at this cutting-edge electric vehicle.

Electrify performance, power, and profits

21.3 kWh powerful **IP67** rated battery that delivers an extended range on a single charge.

300+ V high-voltage technology to minimize system loss and charging time, providing an extended range.

114 Nm of peak torque for better pickup and improved driving experience.

30 kW of peak power that gives you the confidence to tackle any road, even with a full load.

Large cargo box of **7.4 ft** that can carry large size load and increase loading capacity.

835 kg increased payload capacity allows you to carry more in a single trip, saving time and boosting profits.

Top speed of **60 km/h** achieve more trips in less time, with top speed accessible in both Eco and Power modes.

Electrify your business with Higher Range

Range of 160 km* allows for longer journeys without stopping.

Fast Charging - 100 km* Range in 60 min charging

ECO and **POWER** modes offer versatile driving options, enhancing range while reducing turnaround time.

Regenerative braking system boosts the vehicle's range each time the brakes are engaged.

Advanced Driver Assistance System (ADAS)#

- Forward collision
- Pedestrian collision
- Headway monitoring
- Lane departure

Driver Monitoring System (DMS)#

- Driver fatigue warnings
- Driver coaching
- Real time cabin alerts
- Driver behavior insights

#ADAS and DMS are not part of the standard fitment. Available through accessories.

Electrify your business with fast charging

Get more trips and boost your profits with quick charging.

Multiple charging options get you back on the road fast, no long stops.

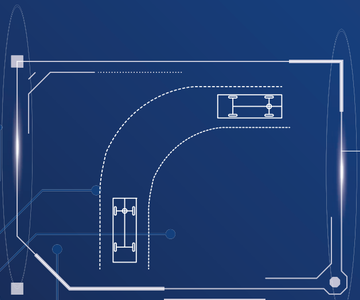

Charging at home

- 3.3 kW AC home charger with 16A 3-pin socket gives a charging speed of: **0 to 100% in 7 hours 10 minutes***
- 6.6 kW AC charger with a 32A wall box charger gives a charging speed of: **0 to 100% in 3 hours 20 minutes***

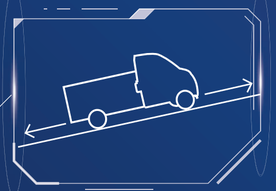

Public Fast charging

- DC Charging Speed: **0% to 80% in 71 minutes***
- At any CCS2 DC public charging station

Electrify your business with unmatched comfort

4.3-meter turning radius for easy manoeuvring through narrow roads.

32% improved gradeability for effortless navigation on hilly roads and smooth flyover climbs.

Creep mode up to 8 km/h for easy single-pedal driving, perfect for heavy traffic and added driver comfort.

Smart Gear Shifter for seamless, gearless, and noise-free driving.

Spacious walk-through cabin with ample legroom and headroom for maximum comfort.

Nemo Universe

Advanced Fleet Management System (FMS$)

Fleet Performance:

- Better fleet management with the help of vehicle details and route planning
- Charging Pattern Insights
- Easy monitoring of energy/power consumption
- Superior / Advanced Vehicle Service Management

Geolocation and Geofencing

Location of the nearest charging station

Discover, navigate and connect with the vast charging station network across the country in just one click
